

## COVID-19 pandemic

In order to prevent the spread of COVID-19 infection, UNICAM **staff** and **students** **must notify if they fall under one of the following categories:**

### Symptomatic positive for COVID-19

They can return to the community after an isolation period of at least 10 days from the onset of positivity, at the end of which a molecular test must be performed, resulting negative (10 days + test).

### Asymptomatic positive for COVID-19

They can return to the community after at least 10 days from the onset of symptoms and a molecular test resulting negative after at least 3 days without symptoms (10 days, of which at least 3 days without symptoms + test).

### Long-term positive for COVID-19

Meaning, those who, even though they no longer present symptoms, continue to result positive to the molecular test. In the event of no symptoms for at least a week, they can interrupt the isolation after 21 days from the onset of symptoms.

### Close contact with confirmed cases

They must stay in isolation for 14 days starting from the last exposure to a confirmed positive case, or for 10 days starting from the last exposure, if they result negative to an antigen or a molecular test performed on the tenth day.

**Whom to notify?** One of the members of the COVID Team

covidteam@unicam.it - *Coordinator* Francesco Amenta - francesco.amenta@unicam.it

**in Camerino**

Donatella Fedeli  
donatella.fedeli@unicam.it

**in Matelica**

Evelina Serri  
evelina.serri@unicam.it

**in Ascoli Piceno**

Raniero Carloni  
raniero.carloni@unicam.it

**in San Benedetto del Tronto**

Filippo Cocchioni  
filippo.cocchioni@unicam.it

**How?**

Using the form published online, at:

**[www.unicam.it/ateneo/coronavirus-unicam-comunica](http://www.unicam.it/ateneo/coronavirus-unicam-comunica)**
