

SAS ACTIVITIES 2019 to acquire transferable skills

# Fair Data A to Z

**Elena Giglia**  
University of Turin

Camerino 2019

**February 20** from 9.30 am to 4 pm

Geology Department - Room H

FAIR data are the building block of EOSC, the European Open Science Cloud. The future of European research will lay upon FAIR and, when possible, Open data. During our interactive workshop we shall see what FAIR data are and why they differ from Open data. A set of tools to check and FAIRify your data will be presented, with a look at a good data management planning. The second session will follow the 'Bring your own data' format: participants will be encouraged to directly try some of the tools on their own datasets, as practice may differ among disciplines.

- 9.30 am Data management: because good research needs good data
- Break
- 11.00 FAIR data in practice: Findable/Accessible
- 12.00 FAIR data in practice: Interoperable/Reusable
- Lunch
- 2.00 pm Bring your own data - learning to use the Data Wizard
