Art. 1 - GOALS AND OBJECTIVES

Aesthetic (cosmetic) medicine has of late become an important reality in medicine and in society at large. The culture of medicine of wellness, pervasive in industrialized Western society, is not free of risks for consumers with inadequate or superficial information that often leads to "do it yourself" remedies that may be ineffective or even harmful.

In this context, advanced university formation provided by pre-eminent figures in the sector who work on an international or national level, would afford safeguards for consumers and offer the high level of quality that should be the ambition of a public university.

Art. 2 - PROFESSIONAL PROFILE

The Master provides high level formation for professionals interested in training in specialties that focus on altering cosmetic appearance through the treatment of conditions including scars, skin laxity, wrinkles, moles, liver spots, excess fat, cellulite, unwanted hair, skin discoloration, and spider veins.

A characteristic of the Master, developed to meet the needs of working physicians, is its e-learning format for the theoretical part of the program. The face-to-face and practical parts of the formation will be conducted in a series of intensive internships coordinated in collaboration with the Foundation International Radio Medicine Centre in Rome.

Art. 3 - OCCUPATIONAL PROSPECTS

Occupational prospects include increase of working opportunities for professionals who will work in their own studios, multi specialist centres, wellness centres, gyms, spas or hotel complexes with specialized sports and health and beauty facilities, as well as in companies that develop and manufacture products for the sector.
